DEF: SCANNERS

Is a device that capture images from photographic prints, posters, magazines and similar sources for computer editing and display. Scanners come in hand-held, feed in and flatbed types and for scanning black –and-white only or color

Very high-resolution scanners are used for capturing high-resolution prints, but low-resolution scanners are adequate for capturing image for computer display.

Scanners usually come with software, such as Adobe Photoshop product, that let you resize and otherwise modify a capture image.

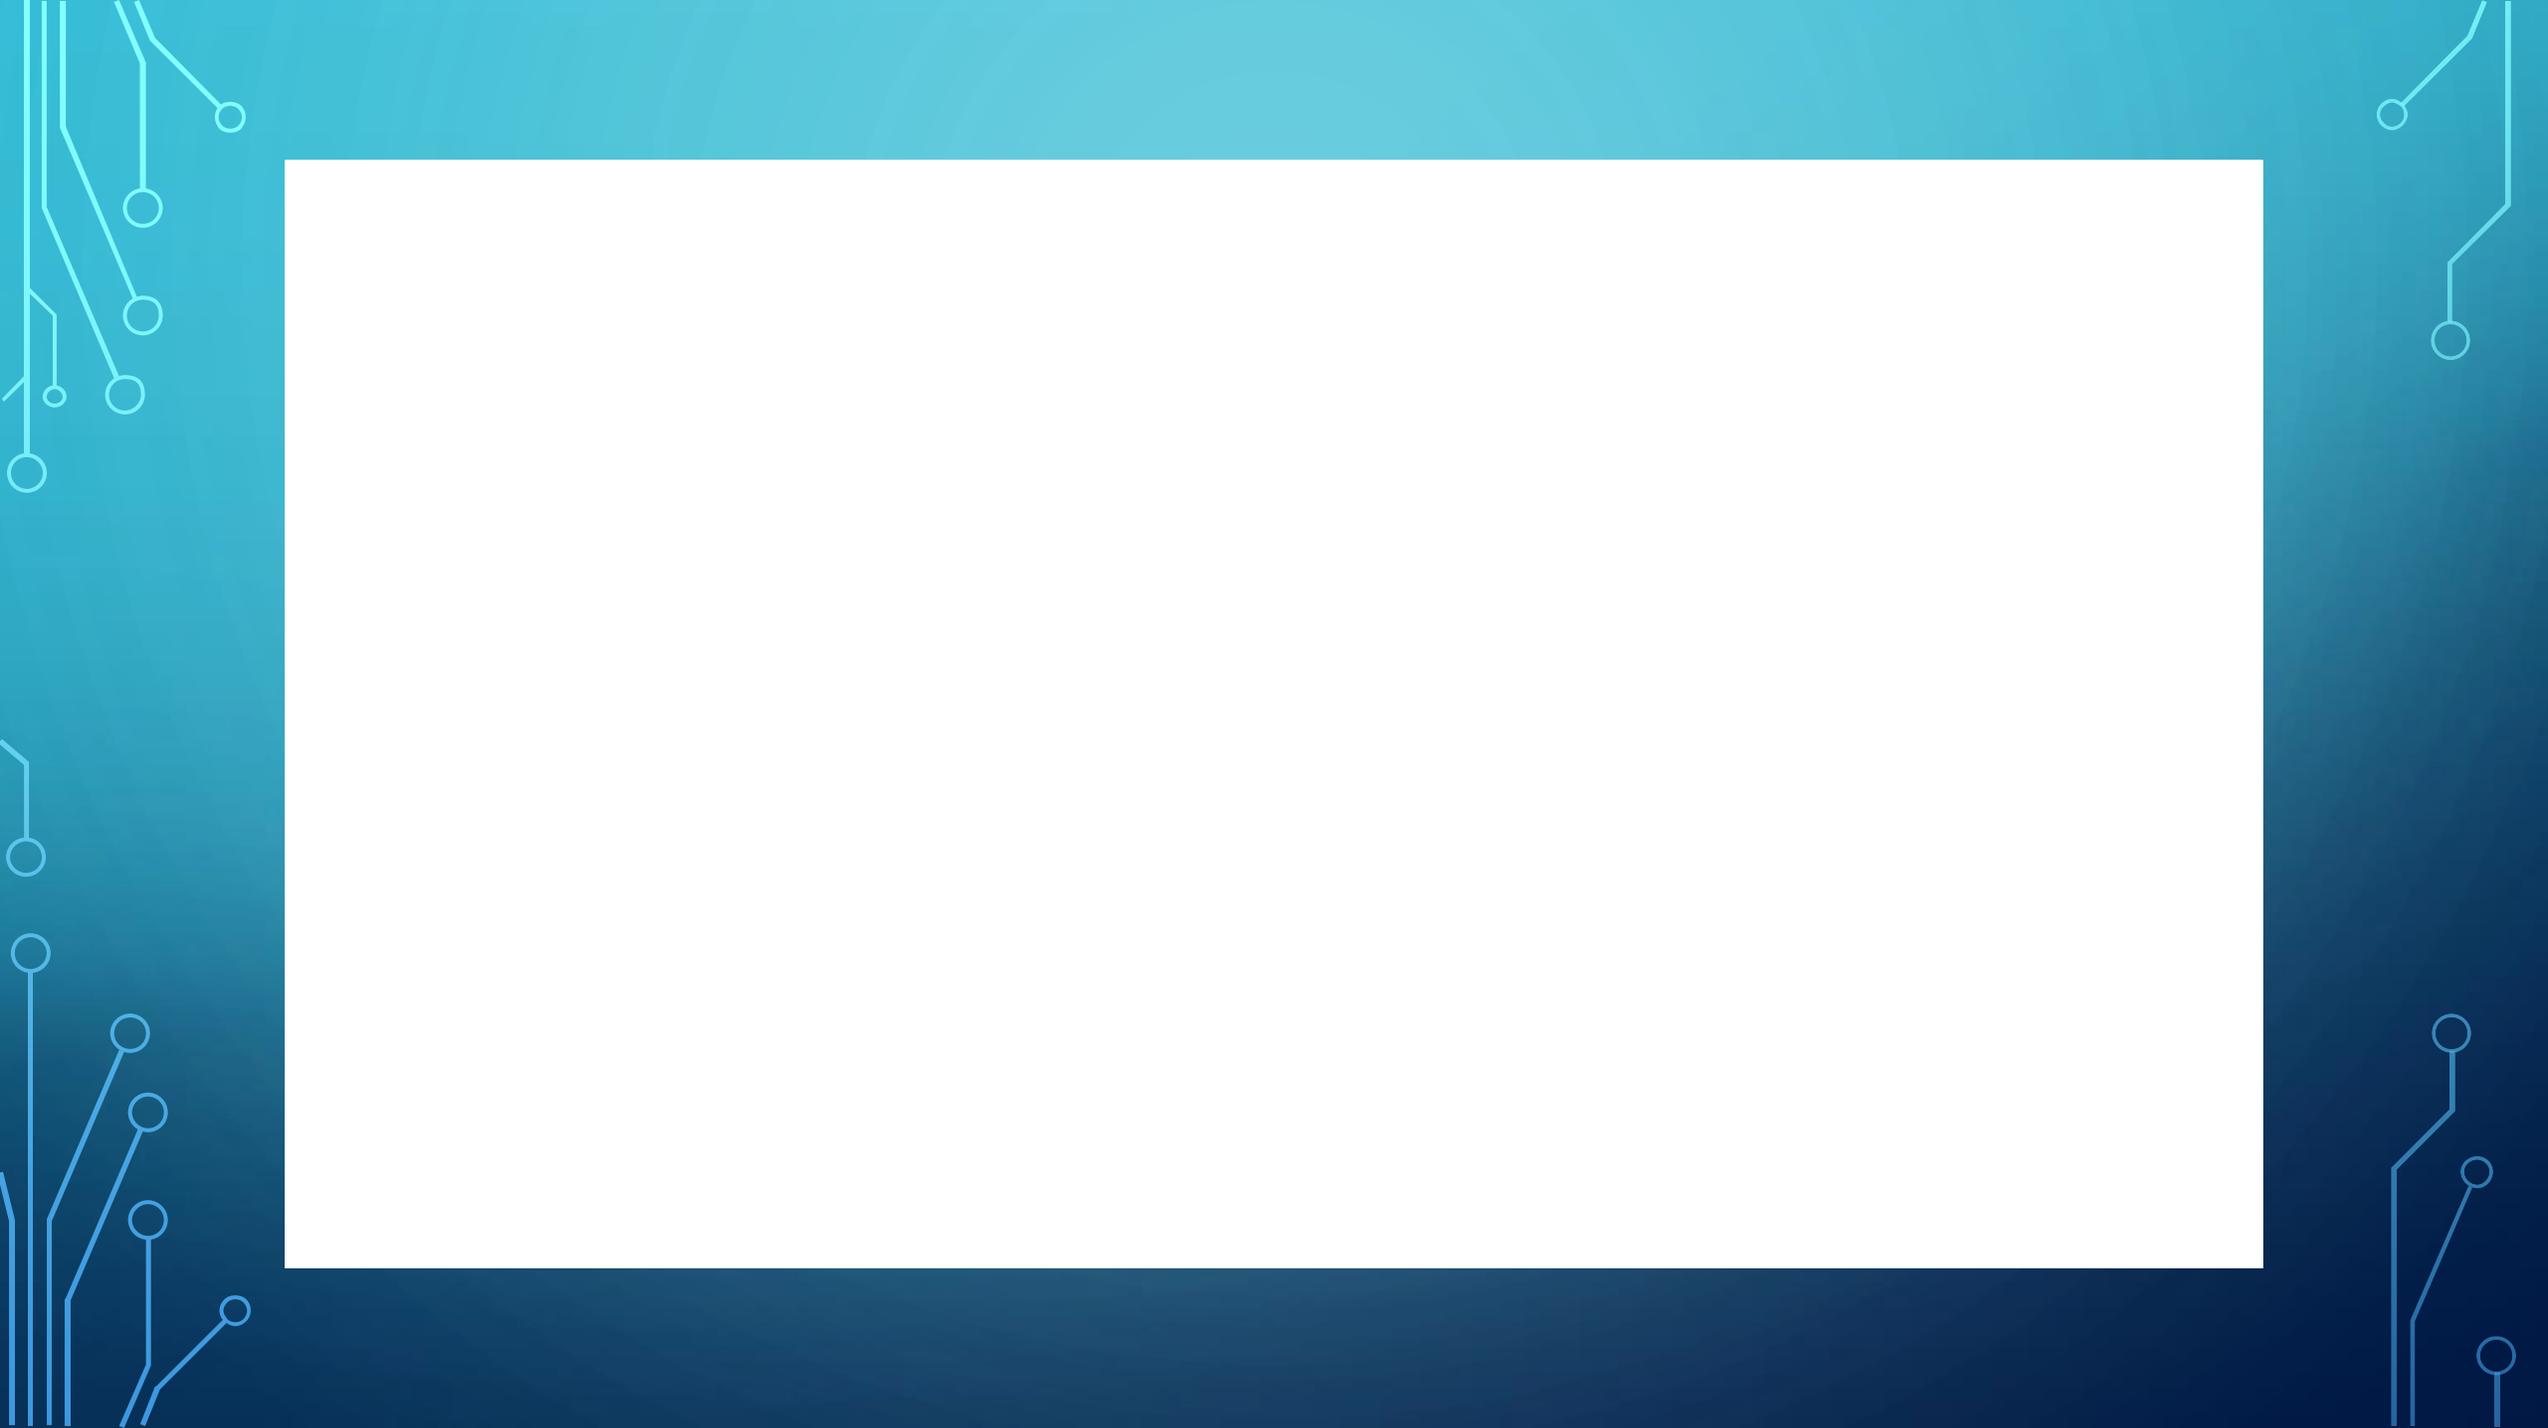

HAND SCANNERS

A scanner that is moved by the hand over the material being captured.

DESKTOP CAMERA SCANNER

FLATBED SCANNERS

A type of optical scanner designed especially for scanning photographs... A typical photo scanner is a sheet-fed scanner that can scan 3x5 or 4x6 photographs at 300 dpi or higher resolution.

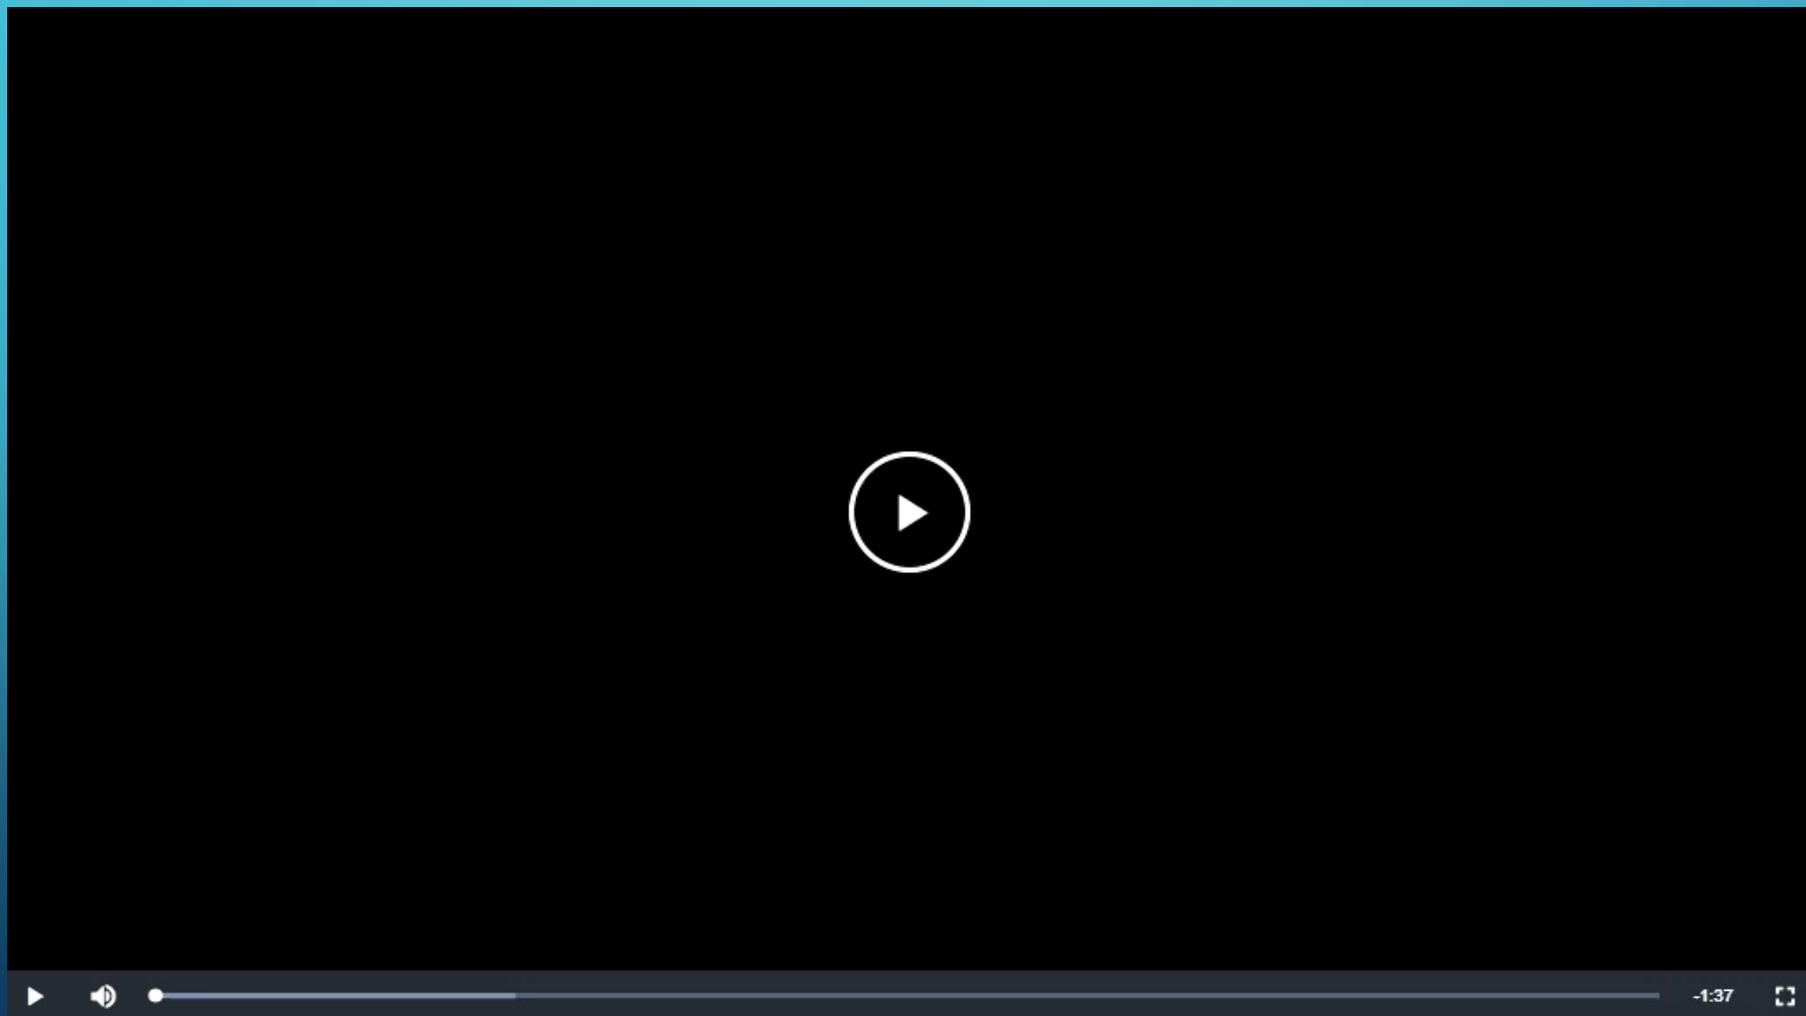

FLATBED SCANNERS

A scanner that provides a flat glass surface to hold a sheet of paper, book or other objects for scanning. The scan head is moved down under the glass.
